

Guide to spots

Ballpoint pen and cosmetics

Clean with methylated spirit.

Blood

Wash off with cold water. If this does not help, add a neutral detergent.

Candle wax

Iron over absorbent paper. Clean with turpentine. Dab with lukewarm water containing a neutral detergent.

Alternative: See chewing gum.

Chewing gum

Cool with ice blocks in a plastic bag or frozen item. Scrape away. Any remaining gum can be carefully removed with benzene.

Chocolate, grease and sweets

Wash with lukewarm water containing a neutral detergent.

Coffee, tea and milk

Remove as much as possible with blotting paper. Wash with water containing a neutral detergent.

Grass and vegetables

Wash with lukewarm water, possibly containing a neutral detergent.

Ink

Remove as much as possible with blotting paper. Clean with 20% methylated spirit. Then wash with water containing a neutral detergent.

Jam, syrup, fruit and juice

Remove as much as possible with a spoon, then wash with lukewarm water containing a neutral detergent.

Nail polish

Dab with nail polish remover. Use acetone if the spot does not disappear.

Oil

Sprinkle talcum on the spot and allow it to work. Brush it away and carefully dab with a cloth moistened with benzene or methylated spirit.

Paint

Oil-based: Clean with turpentine and dab with water containing a neutral detergent.
Water-based: Wash with cold water con-

taining a neutral detergent. *Ask an expert if the spot is old.*

Shoe polish

Carefully dab with a cloth moistened with benzene or methylated spirit.

Urine

One part colourless/unflavoured vinegar mixed with two parts of water. Use a dry cloth as an underlay when the spot is soaked. Remove the diluted vinegar with alternate dry and wet cloths.

Wine and spirits

Remove as much as possible with blotting paper. Wash with water containing a neutral detergent and clean with thinned methylated spirit.

A functional and exclusive furniture fabric is no longer just a dream...

Congratulations on your new furniture with Comfort from Gabriel.

Comfort is a suede-like fabric which is soft and comfortable to sit on. The fabric is practically indestructible and it retains its exclusive appearance year after year. Comfort is easy to maintain, and spots are removed easily and without problems.

10-year guarantee

Comfort has an unsurpassed stability and ability to stretch. This means that wrinkles are avoided – even after long-term use.

Comfort is the market's best microfibre material and it does not pill (fluff). We therefore give you a 10-year guarantee against pilling and wearing through in normal use.

Easy to maintain

Comfort is given an antistatic treatment and is water- and oil-repellent, and thus resistant to dirt and spots. We recommend gentle vacuum cleaning as needed with a soft mouthpiece to preserve the fabric's attractive colour and appearance.

Washing

Comfort can be machine-washed at up to 60°C. Max. shrinkage is 2%. Comfort with flame-retardant backing can be machine-washed on a gentle program at 40°C. The backing can only be washed a few times.

Avoid pre-soaking. Use a neutral washing detergent without chemical bleaches (pH = 7). Use only small quantities. Please note that stitching, zippers etc. can

be washed. Hang dry or tumble dry at low temperature.

Spot removal

A golden rule: Always remove the spot as quickly as possible.

Most types of spot can be removed with lukewarm water, possibly with an added neutral detergent. Do not soak the entire piece of furniture.

Use only the cleaning methods specified in the guide to spots. Always use a clean white cotton cloth and use only small quantities of cleaning agent at a time.

Warning!

Benzene, acetone etc. can dissolve foam on soaking.
