

MEDLEY™

An emulsion of tones
and nuances

Good reasons for choosing

MEDLEY™

- Rich variety of fascinating colours
- Lively looks with blended shades
- Suitable for upholstering both furniture and screens
- Carries the Oeko-Tex health label
- Washable at up to 74 °C – bactericidal

MEDLEY™ – SIMPLICITY WITH BLENDED SHADES

Metals, stone and lava. Colours from the Earth's interior in perfect interplay with a tightly woven, geometric structure. An emulsion of tones and nuances. Strength and functionality. Life and depth. This is Medley – in all its stark simplicity.

Medley is woven in 100% polyester melange yarn with a simple, geometric structure. The tight texture and changing structure of the yarn give the fabric an intense colour depth and a lively surface in multiple shades. The weave structure accentuates the richness of every single nuance and creates a discreet colour play across the fabric's surface. Nuances fuse gently and with varying saturation and intensity, depending on the incident angle of the light.

Colours from the Earth's interior

The colour range of the fabric is inspired by nature's palette and elements from inside the Earth. From embers, ashes and burning lava to autumn earth and fine-grained sand. From warm metals like bronze, copper and brass to cool sensory perceptions like steel, zinc and lead. From dark, deep and discreet nuances to light, poetic and playful pastels.

Individual design experiences

Medley's colour universe comprises a total of 37 different colours, each reflecting nature's great contrasts in its own way and providing a basis for the creation of individual design experiences and unique effects and energies in furnishing.
