

## Classic refined stripes with a comfy feel

Screen fabric Hush Stripe 25 combines a soft, felt-like texture with a small-striped embossed pattern to create a refined, yet warm and cosy feel.

Hush Stripe 25 is an embossed fabric with a refined, classic 25 mm small-striped pattern and a three-layered construction combining non-woven polyester screen fabric Hush with a 6 mm foam core and a jersey backing. The three-layered construction adds a soft and voluminous 3D effect to the classic stripes that perfectly complements the fabric's fleecy, felt-like texture and natural fibre finish.

### Cosy & homely appeal

With its easy-on-the-eye design and discreet melange effect, screen fabric Hush forms the perfect background for the embossed stripes. Together, the felt-like fabric and classic stripes create a refined, yet warm and cosy vibe that bring a homely atmosphere to all types of spaces and environments.

### Set the stripes free

Turn the stripes in any direction – horizontally, vertically or even diagonally – and use the stripes to accentuate organic as well as geometric forms. Mix the fabric's fine-striped pattern with the wider and more bold stripes of Hush Stripe 40 or the graphic grid of Hush Square 40 to create a visual focal point.

### Muted melange colours

The standard colour palette of Hush Stripe 25 encompasses 11 colours from graphic greys to classic and ever-popular red, blue and green. All the colours have an attractive muted look and are distinguished by a discreet melange effect.

### Acoustic design for screens

Hush Stripe 25 is designed specifically for use on all types of vertical surfaces such as screens and panels. Designed for room division, the fabric offers acoustic properties and contributes to improved acoustic performance in all types of spaces and environments.
