

CARBON NEUTRAL 2020

This certificate confirms carbon neutrality achieved by

Gabriel A/S

Reduced CO₂Equivalents

3 452 tons

Supported Project

Beluguppa Wind Farm
Andhra Pradesh, India

World Kinect hereby verifies that Gabriel A/S has successfully offset their carbon emissions for the volume specified above. The project was implemented in accordance with UNFCCC criteria for Verified Emission Reduction (VER) mechanism and is a **Gold Standard** project which is the most rigorous certification standard globally for carbon offset projects. Through their support for this project, Gabriel has chosen to be a part of the solution in the fight against climate change.

Within the scope of this project, a total of 48 wind power plants with a combined capacity of 100,8 MW and expected annual production of 220 GWh have been built in several villages near Belaguppa Mandal in India. The project activity will result in abatement of 215 729 tCO₂e every year and also provides other sustainable development benefits such as creation of permanent and temporary local jobs, contributing to human health and environment and setting a blueprint for other such renewable projects in the region.
