

SUSTAINABLE FABRICS
CRADLE TO CRADLE CERTIFIED®

Gabriel - the #1 fabric

Gabriel®

BEYOND SUSTAINABILITY

By changing the way we think, design and create, we have gone beyond sustainability. We are no longer just seeking to minimize our environmental impact. We are striving to leave a positive footprint. That's a promise.

Making promises is easy. However, with our polyester fabrics Elevation Repetto, Web and the Go Collection - all Cradle to Cradle Certified™ Bronze – we make our promise count.

We go beyond sustainability.
And beyond simple promises.

Our wool fabric Gaja C2C is Cradle to Cradle Certified™ Silver and we are dedicated to developing even more fabrics that change the way you think about sustainability.

CRADLE TO CRADLE® DESIGN PHILOSOPHY

When a tree drops its leaves, they become part of nature's cycle. The leaves are not just waste but provide nourishment for new life.

The cycles of nature are at the very heart of the Cradle to Cradle design® philosophy. Just as the leaves falling, products are perceived as potential regenerative resources that safely reenters the manufacturing process in endless cycles continuously providing raw materials for new products.

Cradle to Cradle Certified™ is a multi-attribute certification program that assesses products and materials for safety to human and environmental health, design for future use cycles, and sustainable manufacturing.

Cradle to Cradle Certified™ products are evaluated for material health, material reutilization, renewable energy use and carbon management, water stewardship, and social fairness.

Cradle to Cradle Certified™ is a certification mark licensed by the Cradle to Cradle Products Innovation Institute.

A Cradle to Cradle certification assesses the product in accordance with the five principles of...

Material health

Knowing the chemical ingredients of every material in a product, and optimising towards safer materials.

Material Reutilisation

Designing products made with materials that come from and can safely return to nature or industry.

Renewable Energy & Carbon Management

Envisioning a future in which all manufacturing is powered by 100% renewable energy.

Water Stewardship

Manage clean water as a precious resource and an essential human right.

Social Fairness

Design operations to honour all people and natural systems affected by the creation, use, disposal or reuse of a product.

CRADLE TO CRADLE® LIFE CYCLES

FROM NATURE TO FABRICS

FROM A PLASTIC BOTTLE TO FABRICS

100% PURE NEW WOOL OF NEW ZEALAND

A renewable raw material that stays in the biological life cycle.

GAJA C2C™

Cradle to Cradle
Certified™ Silver

THE FIRST EUROPEAN CRADLE TO CRADLE WOOL FABRIC

Gaja C2C is a modern classic with a discreet, elegant crêpe structure – one of Europe’s most popular contract upholstery fabrics in pure new wool.

Gaja C2C was the first European pure new wool upholstery fabric to be Cradle to Cradle Certified™ Silver.

Gaja C2C also carries both the Oeko-Tex health label and the EU Ecolabel.

Learn more about [Gaja C2C](#)

100% RECYCLED POST-CONSUMER POLYESTER

Processing and reusing e.g. water bottles in the production of fabrics.

REPETTO™

Cradle to Cradle
Certified™ Bronze

A BEAUTIFULLY DETAILED MACRO-STRUCTURE

Repetto is a classic two-toned fabric with a geometric structure which gives the surface extra depth and vitality.

With its abundance of detail and subtle nuances, Repetto can be used to create an exclusive look or a more flamboyant expression. Repetto is woven from 100% recycled post-consumer polyester, and is part of a technical recirculation process.

Repetto has been Cradle to Cradle Certified™ Bronze and it also carries the Oeko-Tex health label and EU-Ecolabel.

ELEVATION™

Cradle to Cradle
Certified™ Bronze

STYLISH AND CLASSICAL MICRO-STRUCTURE

Elevation is an elegant multicoloured polyester fabric with a vibrant and enchanting micro-structure which, at a distance, radiates tranquillity and depth.

Elevation's texture has fine volume and depth, expressing its matte elegance. Elevation is woven from 100% recycled post-consumer polyester, and is part of a technical recirculation process.

Elevation has been Cradle to Cradle Certified™ Bronze and it also carries the Oeko-Tex health label and EU-Ecolabel.

WEB™

Cradle to Cradle
Certified™ Bronze

A UNIQUELY SUSTAINABLE MESH

Web is a strong, self-supporting, and functional mesh fabric with yarns crossing each other in endless intersections. Open spaces between the yarns create a transparent effect and the fabric's translucency - a lightness and airiness design.

Web has a superior load-bearing capacity that makes it ideal for chair backs, seats, or for light, airy, and semi-transparent screens.

Web has been Cradle to Cradle Certified™ Bronze and it also carries the Oeko-Tex health label and EU-Ecolabel.

Learn more about [Web](#)

GO COLLECTION™

Cradle to Cradle
Certified™ Bronze

ONE COLLECTION – THREE UNIQUE EXPRESSIONS

All three Go fabrics are based on the same classic weave structure, but they each have their own unique expression. Go Uni is a one-coloured, clear-cut and streamlined design with a slightly shiny and almost high-tech, industrial look. As a contrast, Go Couture and Go Check are two-coloured fabrics strongly inspired by the checks and patterns of the fashion world.

The Go Collection has been Cradle to Cradle Certified™ Bronze and it also carries the Oeko-Tex health label and EU-Ecolabel.

We were the first Danish company to obtain a Cradle to Cradle Certified™ Silver product.

MAKING A DIFFERENCE

Sustainability practices have become an integral part of who we are and developing fabrics with integrity and respect for the world around us makes us proud.

We take pride in the fact that our fabrics are certified and meet the highest standards. However, it is not just about labels and certifications. It is about making a real difference.

Looking to the future, we are aware of our responsibility to continue to address complex sustainability challenges and to develop new and innovative fabrics that reflect and protect the life cycles of nature.

A **Cradle to Cradle®** company takes sustainability to the next level.

The central premise of the philosophy is that all products should be designed for reuse and eventually turned into new raw material.

All Gabriel Cradle to Cradle Certified™ fabrics are certified according to version 3, which is the newest and most strict version. 12% of our fabrics are Cradle to Cradle Certified™.

The **EU Ecolabel** helps customers identify products that have a reduced environmental impact throughout their life cycle - from raw material to end product, distribution and disposal.

56% of our fabrics are EU Ecolabel certified, and we were the first fabric manufacturer in the world to obtain the EU Ecolabel for our furnishing fabrics.

Oeko-Tex is a global certification system for textiles testing for harmful substances to ensure the safety of textile products and consumer health.

95% of our fabrics carries the Oeko-Tex label.
